1

problems: Quitting from lines 223-235 (Introduction.Rmd) Error in cat(paste0(contributors\$desc, collapse = “,”)) :

solutions: Adding encoding = “UTF-8” in line 224 can fix it.

2

problems: ‘make’ not Found

solutions: install ‘Rtools’ and

```
writeLines('PATH="${RTTOOLS40_HOME}\\usr\\bin;${PATH}"', con = "~/Renvirom")
```

3

problems: ! Package fontspec Error: The font “Inconsolata” cannot be found. ! Package fontspec Error: The font “Andale Mono” cannot be found.

solutions: download the fonts and install them.

4

problems: ! LaTeX Error: Environment sidebar undefined.

solutions: install tinytex and

```
devtools::install_github(c('yihui/knitr', 'rstudio/flexdashboard'))
```

```
## Skipping install of 'knitr' from a github remote, the SHA1 (7d2dd40b) has not changed since last install
##   Use 'force = TRUE' to force installation
```

```
## Skipping install of 'flexdashboard' from a github remote, the SHA1 (02207b70) has not changed since last install
##   Use 'force = TRUE' to force installation
```
